

PROFESSIONAL SUMMARY

TS/SCI cleared Operations Support Lead with hands-on expertise in Linux administration, Kubernetes (K3s), GitOps workflows, and high-availability infrastructure. Proven track record working in air-gapped environments, managing cross-agency customer relationships across global time zones, and resolving complex operational gaps under strict deadlines. Experienced problem solver in high-compliance, mission-critical environments supporting various customers .

TECHNICAL SKILLS & CERTIFICATION

- Clearance & Certifications: Active TS/SCI (CI Polygraph), CompTIA Security+
- Linux & systems: RHEL, Debian, NixOS, Systemd, journalctl, Process Debugging, Networking (DNS, FirewallD, Reverse Proxies)
- Kubernetes & Containers: Kubernetes (K3s), Podman, Docker, Helm, Kustomize, GitOps, SOPS
- Infrastructure & DevOps: Terraform, FluxCD, Git/GitHub Actions, Storage (Longhorn, Backblaze B2)
- Observability & Scripting: Prometheus, Grafana, Python, Bash

PROJECTS

Newelle Package Maintainer – Nixpkgs (Aug 2026 – Present)

[Open Source Contributions](#)

- Own ongoing maintenance of the Newelle package in Nixpkgs, coordinating package updates, resolving bugfixes, and ensuring compatibility within a distributed open-source ecosystem.
- Diagnosed one package defect and resolved a user-reported bug by adding missing dependencies, restoring the embedded web browser and MCP functionality.
- Contributed upstream to the Newelle project, improving documentation, recommending removal of outdated nix flake, and modifying nix installation method to match modern nixpkgs workflow.

Cloud-Native Lab (Jan 2022 – Present)

[Independent Project](#)

- Kubernetes & GitOps: Designed and operated a three node High-Availability K3s cluster hosting 20+ containerized workloads, managing deployments declaratively using FluxCD, Helm/Kustomize, SOPS, and git.
- System Troubleshooting & Log Analysis: Diagnosed Kubernetes, Linux, networking, and application failures using CLI tools (journalctl, ss, kubectl), application logs, and Prometheus/Grafana telemetry developing repeatable troubleshooting workflows for common failure modes.
- Networking & Platform Security: Implemented Kubernetes persistent storage with Longhorn, internal ingress using Traefik, encrypted secret management with SOPS, and identity-based remote access through Tailscale.
- Infrastructure-as-Code & Recovery: Provisioned S3-compatible backups using Terraform automating etcd backups, and executed monthly disaster recovery exercises to ensure data integrity.

- **CI/CD & Web Automation:** Built automated GitHub Actions and Cloudflare deployment workflows for two Hugo-based websites, compiling source content into optimized static artifacts and automatically publishing changes.

PROFESSIONAL EXPERIENCE

Operations Support Lead (Oct 2025 - Present)

U.S. Air Force / Department of Defense / National Security Agency

- **Workflow Automation:** Developed automated tracking for inbound/outbound personnel logistics, mitigating human error and reducing weekly administrative maintenance overhead by 20%.
- **System Accountability:** Maintained 100% data integrity and records accountability across four division to support real-time emergency response readiness.
- **Senior Leaders Support:** Served as a primary point of contact for four division leaders across a 300+ person organization, resolving documentation, readiness, and inter-service coordination issues under time-sensitive operational requirements.

Team Lead and Trainer (Jun 2023 - Oct 2025)

U.S. Air Force / Department of Defense / National Security Agency

- **Interagency Customer Support:** Managed direct support and coordination for three external customers across multiple time zones, gathering detailed requirements, fulfilling critical intelligence gaps, and coordinating follow-ups through secure communication channels.
- **Incident Summaries & Technical Documentation:** Authored concise executive incident summaries and detailed technical reproduction steps to bridge communication between tactical analysts and external agency engineers.
- **Team Leadership & Training:** Led a 15-person operational team and delivered 200+ hours of hands-on technical training, accelerating qualification timelines for 14 analysts by an average of 45 days.

Intelligence Analyst (Jan 2021 - Jun 2023)

U.S. Air Force / Department of Defense / National Security Agency

- **Target Network Analysis:** Conducted technical analysis across 6 global communications networks, identifying key protocol behaviors and operational requirements.
- **Stakeholder Dissemination:** Published and delivered specialized intelligence reports to over 20 external customer organizations, satisfying 6 core strategic Information Needs under tight deadlines.
- **Executive Communication:** Delivered dozens of decision-focused briefings to senior military leaders from O-4 through O-7, translating complex technical intelligence into operational implications, risks, and recommended actions.

EDUCATION & CERTIFICATIONS

Defense Language Institute: B.A. in Linguistics (Spanish Emphasis) (2025)

Mississippi College: Coursework toward B.S. in Biology (Pre-Med track) (2020)

CompTIA: CompTIA Security+ (2026)
